

Phylofactor Trait Analysis

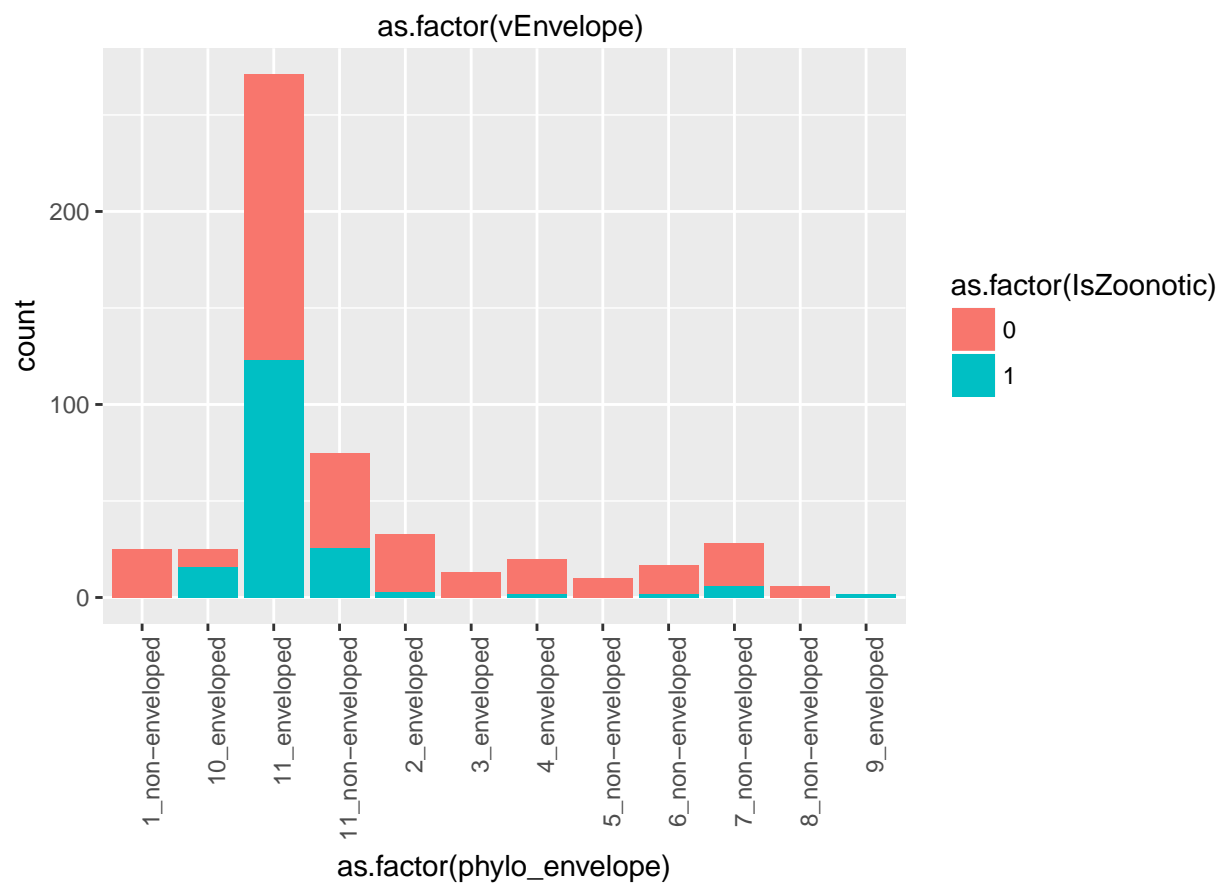

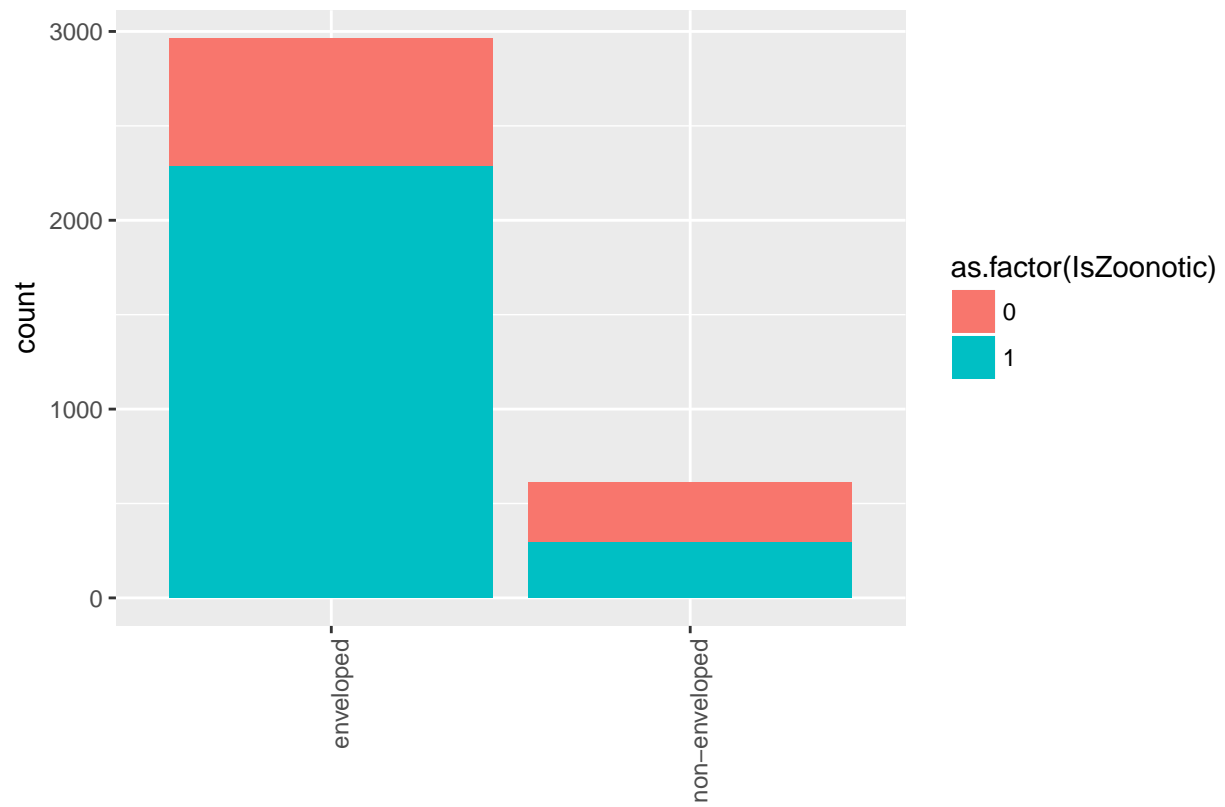

Current State of the Dataset

Transmission Mode

Transmission mode is coming from the Geohegan & Holmes paper. We have 179 and of those 83 are NA. So, for the majority of observations (46.4%) we do not have data on this transmission mode yet.

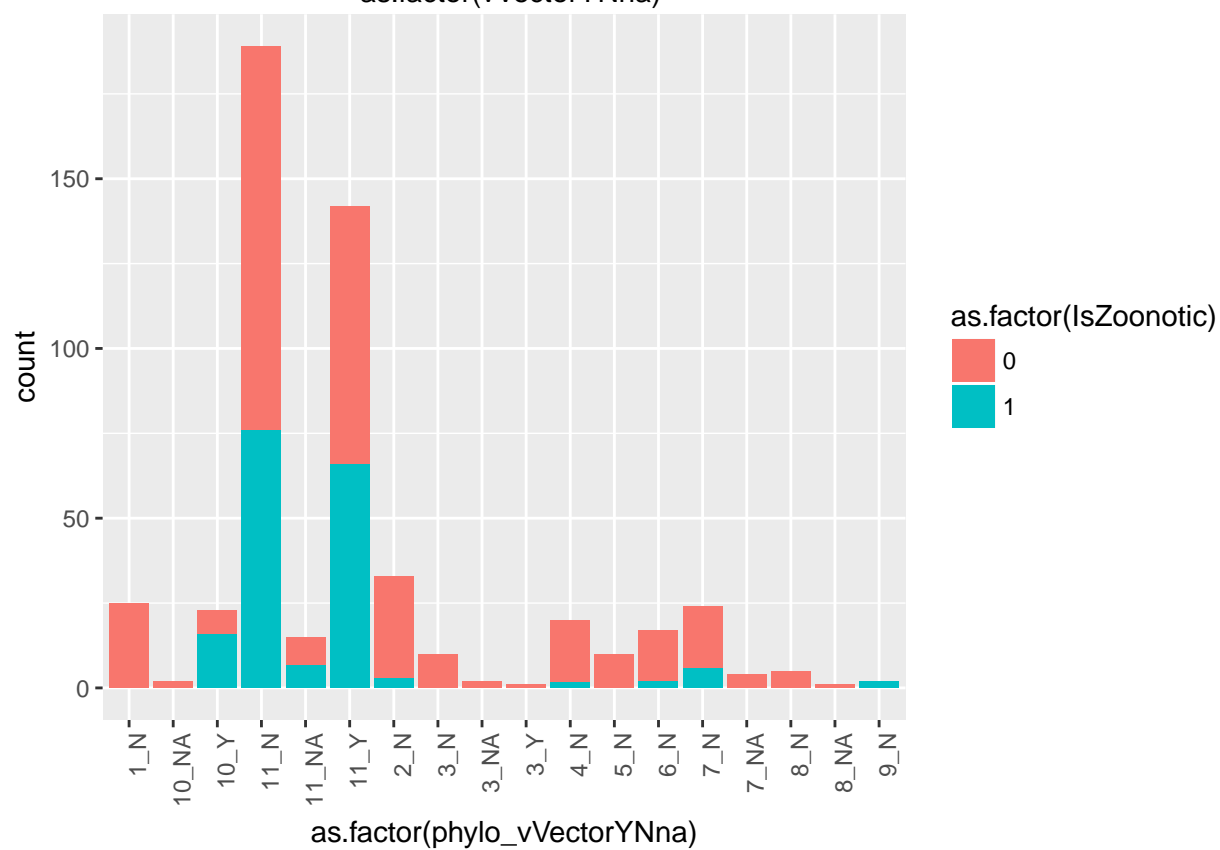

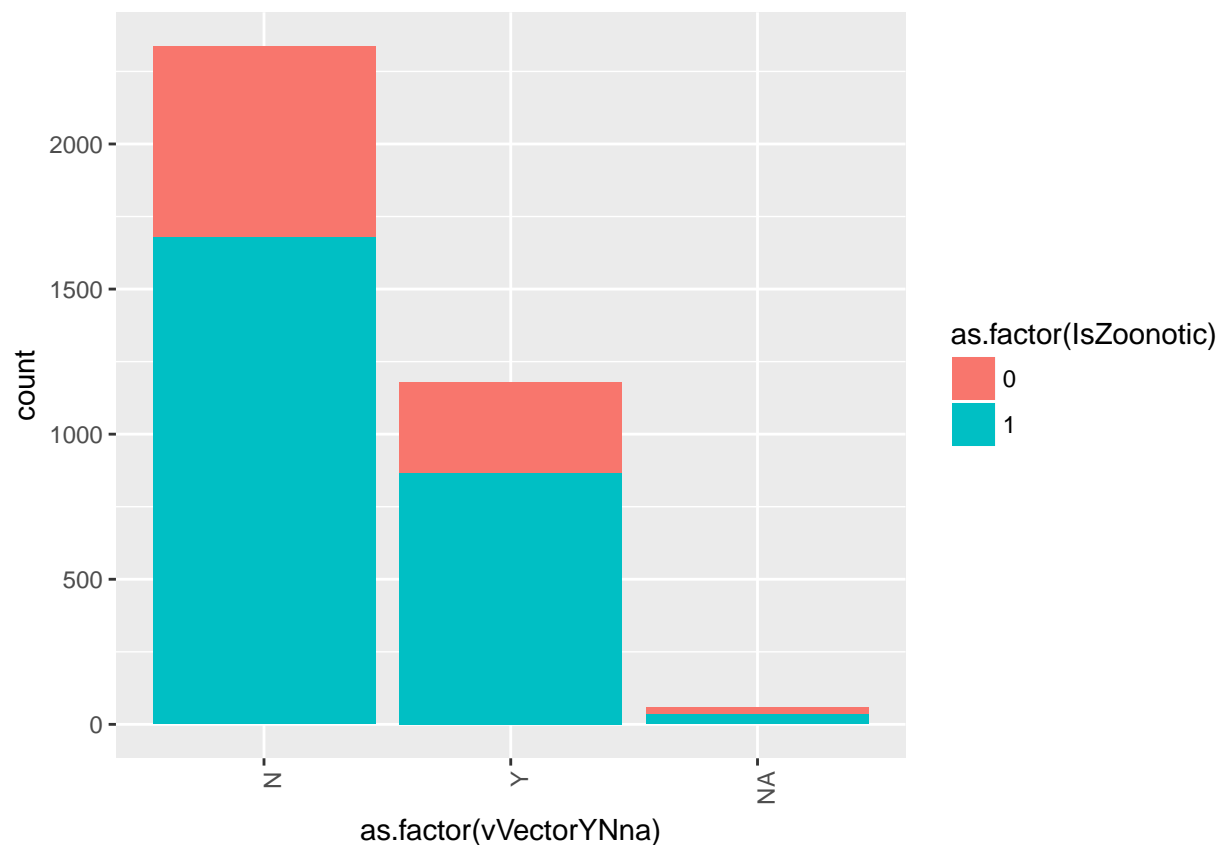

Envelope Status

Envelope status is coming from the original Olival paper. We have 521 and of those 0 are NA. So, (0%) observations are missing data on envelope status, hooray!

Vector Status

Transmission mode is coming from the Geohegan & Holmes paper. We have 180 and of those 7 are NA. So, for(3.9%) of observations we do not have data on vector transmission yet.

Human to Human Transmission

Human to Human transmission is also coming from the Geohegan & Holmes paper. We have 179 and of those 83 are NA. So, for (46.4%) of observations we do not have data on vector transmission yet.
